## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claim(s) 1-9, drawn to an image pickup device for applying browse restriction to a digital image.
- Group II, claim(s) 10-13, drawn to a display device for determining whether or not to release browse restriction for a digital image.
- Group III, claim(s) 14-21, drawn to a rights information server for managing a browse restriction determination table.
- Group III, claim(s) 22-24, 26-30, drawn to a digital image management system/method for managing browse restriction rights of digital images.

The inventions listed above lack a technical relationship involving one or more of the same or corresponding *special technical features*, which is defined in PCT Rule 13.2 as “those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.” The Examiner notes that the common feature found in all four of the inventions is processing browse restriction according to predetermined information.

This feature however, is not considered a *special technical feature* under Rule 13.2 because it is taught by Vau<sup>1</sup>. Because this feature was well known in the art, it fails to define a contribution over the prior art. Therefore, the inventions listed above lack a technical relationship involving one or more of the same or corresponding *special technical features*.

### ***Election Required***

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
